Professional Summary

Software Engineer with hands-on experience building AI-powered and full-stack software using Python, deep learning, computer vision, React.js, Django, Spring Boot, REST APIs, and SQL/NoSQL databases. Experienced in training object detection models using YOLO, CNNs, OpenCV, and image processing, developing web applications, and optimizing inference and processing pipelines. Strong foundation in algorithms, system design, software engineering, testing, security, and scalable backend development. Solved 400+ coding problems.

Education

Pandit Deendayal Energy University, Gandhinagar

Oct 2022 – May 2026

B.Tech. in Information & Communication Technology

CGPA: 9.06/10.0

Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

Experience

Software Engineer – DRC India

Jul 2026 – Present

- Build AI-powered image-processing and computer-vision solutions using Python, YOLO, CNNs, OpenCV, and deep learning for automated object detection and inspection.
- Design, train, validate, and optimize deep learning models, including dataset preparation, image preprocessing, model training, evaluation, and inference optimization.
- Develop web applications and backend components integrating AI models into software workflows for practical deployment of computer-vision solutions.
- Optimize image-processing and inference pipelines using efficient algorithms, ROI-based processing, and multi-threading to reduce processing time and improve performance.

Software Development Intern – DRC India

Jan 2026 – Jul 2026

- Developed backend modules and database-driven features using Python, Django, SQLite, MongoDB, and PostgreSQL for internal software systems.
- Contributed to computer-vision and image-processing workflows using Python and OpenCV for automated detection, segmentation, and quality inspection.

Software Development Engineer Intern – Unlock Discounts

May 2025 – Aug 2025

- Developed React.js features with REST API integration for authentication, product listings, and discount-service workflows.
- Tested and debugged frontend/API workflows, reducing post-deployment bugs by 30%, and contributed through Agile sprints, code reviews, and Git.

Projects

Job Portal Application [↗](#) | Spring Boot, React.js, MySQL, Spring Security, Microservices

- Built an end-to-end full-stack platform with React.js, Spring Boot, secure authentication, RBAC, and REST APIs for recruiter and candidate workflows.
- Designed modular backend services using Spring JPA and microservices concepts with focus on scalability, maintainability, and secure data access.

Bitcoin Price Prediction Tool [↗](#) | Python, TensorFlow, Keras, LSTM, GRU, CNN

- Built and trained LSTM, GRU, and CNN models using TensorFlow/Keras and improved forecasting accuracy by 12% through feature engineering and hyperparameter tuning.

Business Management Web Application [↗](#) | Spring Boot, Java, MySQL, Thymeleaf, Spring Security

- Developed a full-stack application for customer, inventory, and order workflows with secure authentication, RBAC, Hibernate/JPA, and MySQL.

Technical Skills

Languages: Python, Java, JavaScript, C++, SQL, HTML, CSS

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

Backend & Frontend: Django, Spring Boot, Spring Security, Spring JPA, Hibernate, REST APIs, Microservices, React.js

AI/ML & Computer Vision: Deep Learning, YOLO, CNN, TensorFlow, Keras, PyTorch, Scikit-learn, OpenCV, Image Processing, Object Detection, Image Segmentation, LSTM, GRU, NumPy, Pandas

Databases: PostgreSQL, MongoDB, MySQL, SQLite

Cloud/DevOps: AWS, Docker, Git, GitHub, GitLab, Linux, Ubuntu, CI/CD Basics, Postman

Practices: API Testing, Unit Testing, Test Case Design, Debugging, Performance Optimization, Security, Agile/Scrum, Code Review

Achievements & Certifications

- Solved 400+ coding problems: LeetCode (230+), HackerRank (100+), CodeChef (Rating: 1403).
- JEE Main 2022: 95.96 Percentile | ACPC Rank: 430.
- Certifications: Spring Boot 3 & Hibernate, Deep Learning Essentials, Prompt Design in Vertex AI, Python for Data Science, Java Basics.
